Chris,

I'm a step behind, I was informed that DEP hadn't to date received a response regarding Keystone Sanitation Landfill from you.

Larry

Here is all I got back from EPA. See attached. I replied with the specific address.

While they say the property is not used for agricultural purposes, the hauler says it is being farmed.

Larry can you please reach out to EPA and see if they can get Mr. Sweeney an answer? I am assuming it will be no but feel they should have the final say in this.

Thanks,
Ben

Beth and Ben,

The septage hauler is still asking if we would permit this landfill property for the land application of septage. I didn't hear back from anyone at EPA.

I assume the answer is no but want to get back to them ASAP.

Beth,

As we discussed yesterday. Sean Herrick (the hauler who's permit we pulled back in 2014) is looking to buy a portion of the old landfill and wants to install storage tanks and permit the field areas for the land application septage.

He specifically mentioned property owned by an Ex. 6 Personal Privacy (PP) at 355 Clouser Road and that it was the site of the landfill.

I emailed EPA. Their response is attached. I replied that he is interested in the landfill property.

Tom

Had a septage hauler call asking if he buys this property would he be able to land apply septage under one of our GPs. He said there is 70 acres of hay. We'll check the EPA records. I think we had a similar request years ago with the Shealer site.

Any thoughts?

There is nothing under our regulations or permit that would prohibit that land application to an old landfill. As long as a crop is harvested.
